

Regarding the regulated quantities of toxic substances, restricted substances, prohibited substances and permitted substances

provision

[Enforcement date: April 11, 2024] [Ministry of Environment Notice No. 2024-77, April 11, 2024, Partially revised]

Ministry of Environment (Chemical Safety Division), 044-201-6833

Article 1 (Purpose) This notice is in accordance with Article 19, Paragraphs 2 and 8 and Appendix 3-2, Subparagraph 2 of the Enforcement Regulations of the Chemical Substances Control Act (hereinafter referred to as the "Regulations").

According to the upper regulation quantity of toxic substances, restricted substances, prohibited substances and permitted substances, excluding accident preparedness substances among hazardous chemicals,

The purpose is to regulate the lower regulation quantity.

Article 2 (Regulatory Quantity) The upper and lower regulatory quantities of hazardous chemical substances are as follows. However, accident preparedness substances are subject to regulation.

Follow the quantity standards for each accident preparedness material in Article 3-2, Paragraph 1 of the attached Table.

- 1. The upper and lower specified quantities of toxic substances are as per Table 1.
- 2. The upper and lower regulated quantities of restricted substances are as per Table 2.
- 3. The upper and lower prescribed quantities of prohibited substances are as per Table 3.

Article 3 (Review Period) The Minister of Environment shall review this notice in accordance with the "Regulations on the Issuance and Management of Ordinances, Regulations, etc." by 2024.

The validity is reviewed every three years from July 1st (until June 30th of every third year) and improvements are made.

Action must be taken.

Supplementary Provisions <No. 2024-77, April 11, 2024>

This notice shall take effect from the date of promulgation.

ÿ [Appendix 1]

Specified quantity by toxic substance

1. General criteria

A. In the case of toxic substances that fall under the category of accident preparedness substances, the accident preparedness measures in Article 1 of Appendix 3-2 of the Rules

Quantity criteria are applied by material.

B. The standard quantity in the table is applicable to all toxic substance manufacturing/use facilities and storage/preservation facilities in the workplace.

It refers to the maximum amount that can be maintained at any moment.

A. The values marked with * among the standard quantities in the table are liquid or liquid in the form of a substance during handling.

In case of solid, it shall be the specified quantity of the substance.

La. The substances of Nos. 256, 275 and 504 of the table are liquids under normal temperature and pressure conditions.

**The values marked with ** are the standard quantities.

The Director of the Chemical Safety Institute will provide specific information on the maximum amount that can be stored, etc.

It may be determined and announced.

2. Quantity criteria

Quantity of restricted substances

1. General criteria

A. In the case of substances subject to accident preparedness among restricted substances, the accident preparedness standard in Article 1 of Appendix 3-2 of the Rules shall apply.

Quantity criteria are applied by material.

B. The specified quantity in the table is for all restricted substance manufacturing/use facilities and storage/preservation facilities at the workplace.

It refers to the maximum amount that can be maintained at any moment.

A. The values marked with * among the standard quantities in the table are liquid or liquid in the form of a substance during handling.

In case of solid, it shall be the specified quantity of the substance.

A. The Director of the Chemical Safety Agency will provide specific information on the maximum amount that can be stored, etc.

It may be determined and announced.

2. Quantity criteria

Serial number	unique number	Chemical name	CAS number	Sub-regulation quantity (tons)	Upper regulation quantity (tons)
1	06-5-1	Salts of Malachitegreen	2	06-5-2

Quantity of prohibited substances

1. General criteria

A. In the case of substances that fall under the category of accident preparedness substances among prohibited substances, the accident preparedness criteria in Article 1 of Appendix 3-2 of the Rules shall apply.

Quantity criteria are applied by material.

B. The specified quantity in the table is for all prohibited substance manufacturing/use facilities and storage/preservation facilities in the workplace.

It refers to the maximum amount that can be maintained at any moment.

A. The values marked with * among the standard quantities in the table are liquid or liquid in the form of a substance during handling.

In case of solid, it shall be the specified quantity of the substance.

A. The Director of the Chemical Safety Agency will provide specific information on the maximum amount that can be stored, etc.

It may be determined and announced.
