

Toxic Substances Control Act (TSCA): Polymers 1000 to 10000 Daltons (MW) Exempt Under the 1995 Polymer Exemption Rule (EPA Flag PE1)

Special flags are used throughout the TSCA Inventory to identify substances on the Inventory that are subject of the EPA rule or order promulgated under TSCA, as well as to indicate types of full or partial exemptions from TSCA reporting requirements.

The flag for **PE1** indicates a polymer that has a number-average molecular weight of greater than or equal to 1,000 daltons and less than 10,000 daltons and that is exempt under the 1995 polymer exemption rule. The polymer's oligomer content must be less than 10 percent by weight below 500 daltons and less than 25 percent by weight below 1,000 daltons.

More information about the EPA Regulatory Flags and the TSCA Inventory can be found here: [How to Access the TSCA Inventory | US EPA](#).
