Part 1—Preliminary

1.01 Name of Regulations

These Regulations are the *Environment Protection and Biodiversity Conservation Regulations 2000*.

1.03 Definitions—the dictionary

- (1) The dictionary at the end of these Regulations defines certain words and expressions, and includes references to certain words and expressions that are defined in the Act or elsewhere in these Regulations (*signpost definitions*).

Example: The signpost definition ‘**aircraft**—see Act, section 528’ means that the expression **aircraft** is defined in section 528 of the Act.

- (2) The dictionary is part of these Regulations.
- (3) A definition in these Regulations applies to each use of the word or expression in these Regulations, unless the contrary intention appears.

Part 2—Matters of national environmental significance

Division 2.1—Nuclear action

2.01 Nuclear action (Act s 22(1))

For paragraph (g) of the definition of **nuclear action** in subsection 22(1) of the Act, a nuclear action includes establishing, significantly modifying, decommissioning or rehabilitating a facility where radioactive materials at or above the activity level mentioned in regulation 2.02 are, were, or are proposed to be used or stored.

2.02 Nuclear activity level (Act s 22(1))

- (1) For paragraphs (c) and (d) of the definition of **nuclear installation** in subsection 22(1) of the Act, the activity level is:
 - (a) if the installation contains only 1 type of nuclide and all sources of that nuclide are sealed sources— 10^9 times the activity value for the nuclide set out in Part 1 of Schedule 1 to the *Australian Radiation Protection and Nuclear Safety Regulations 2018*; or
 - (b) if the installation contains only 1 type of nuclide and all sources of that nuclide at or above the activity concentration value mentioned for the nuclide in Part 1 of Schedule 1 to the *Australian Radiation Protection and Nuclear Safety Regulations 2018* are unsealed sources— 10^6 times the activity value for the nuclide set out in that Part; or
 - (c) in any other case—a level for which a mixture of sealed and unsealed sources of nuclides is excessive.
- (2) A mixture is excessive if:
 - (a) the sealed source activity value is greater than 10^9 ; or
 - (b) the unsealed source activity value is greater than 10^6 and the unsealed source activity concentration value is greater than 1; or
 - (c) both:
 - (i) the sum of the sealed source activity value divided by 10^9 and the unsealed source activity value divided by 10^6 is greater than 1; and
 - (ii) the unsealed source activity concentration value is greater than 1.
- (3) In this regulation:

sealed source activity value means the sum of the fractions calculated for each nuclide by dividing the activity of the nuclide in the mixture in sealed sources by the activity value for the nuclide set out in Part 1 of Schedule 1 to the *Australian Radiation Protection and Nuclear Safety Regulations 2018*.

unsealed source activity concentration value means the sum of the fractions calculated for each nuclide by dividing the activity concentration for each nuclide in the mixture by the activity concentration value for the nuclide set out

Regulation 2.03

in Part 1 of Schedule 1 to the *Australian Radiation Protection and Nuclear Safety Regulations 2018*.

unsealed source activity value means the sum of the fractions calculated for each nuclide by dividing the activity of each nuclide in the mixture in unsealed sources by the activity value for the nuclide set out in Part 1 of Schedule 1 to the *Australian Radiation Protection and Nuclear Safety Regulations 2018*.

2.03 Large-scale disposal facility (Act s 22(2))

For the definition of ***large-scale disposal facility*** in subsection 22(2) of the Act, a facility used for the disposal of radioactive materials at or above the activity level mentioned in regulation 2.02 is prescribed.

Part 2 Matters of national environmental significance

Division 2.2 Additional matters of national environmental significance

**Division 2.2—Additional matters of national environmental
significance**

Note: Division 2.2 reserved for future use.

Division 2.3—Actions taken to be covered by Division 1 of Part 3 of the Act

2.10 Grazing domestic stock

For subsection 25A(1) of the Act and to give effect to Australia's obligations under Article 8 of the Biodiversity Convention, the grazing of domestic stock in the Australian Alps National Parks and Reserves is taken to be an action to which subsections 15B(5) and 15C(9) and (10) of the Act apply.

Note: The Australian Alps National Parks and Reserves were included in the National Heritage List by an instrument published in *Gazette* No. S237 on 7 November 2008.

Part 2A—Actions covered by Ministerial declarations

2A.01 Criteria for accreditation of management arrangements for Commonwealth managed fisheries

- (1) This regulation applies in relation to a decision by the Minister to accredit a management arrangement that applies to a fishery for the purposes of a declaration under section 33 of the Act.
- (2) For paragraph 33(3)(a) of the Act, the criteria that must be met by the management arrangement and the law under which it is in force, or is to be in force, are as follows:
 - (a) the law under which the management arrangement is in force, or is to be in force, must be the *Fisheries Management Act 1991* or the *Torres Strait Fisheries Act 1984*;
 - (b) the management arrangement must be endorsed by the Minister under an agreement made under section 146 of the Act;
 - (c) the management arrangement must be in the form in which it was endorsed.
- (2A) Paragraph (2)(c) does not apply to an amendment of an accredited management arrangement if the Minister:
 - (a) is satisfied that the actions approved in accordance with the amended arrangement will not have significantly greater impacts on the environment than actions approved in accordance with the existing arrangement; and
 - (b) has not made a determination under subsection 36A(1) of the Act in relation to the amendment.
- (3) In this regulation:

fishery means a fishery to which the *Fisheries Management Act 1991* or the *Torres Strait Fisheries Act 1984* applies.

2A.02 Publication of determination about minor amendments to an accredited management arrangement or authorisation process

For subsection 36A(3) of the Act, a determination must be published at an appropriate location on the Internet.

2A.03 Requirements for a declaration

For paragraph 37C(b) of the Act, the Minister may make a declaration under section 37A of the Act if he or she is satisfied that it meets the following requirements:

- (a) an adequate assessment of the relevant impacts of actions which can be taken under the bioregional plan to which the declaration relates has been undertaken as part of the process for developing the bioregional plan;

Regulation 2A.04

- (b) the bioregional plan addresses:
 - (i) the characteristics of the environment in which the actions will take place and which will be impacted by the actions; and
 - (ii) the identification of matters of national environmental significance likely to be affected by the actions, and the location and characteristics of those matters; and
 - (iii) identification of the relevant impacts of the action or actions; and
 - (iv) identification of feasible measures to prevent or mitigate relevant impacts of the action or actions;
- (c) the bioregional plan adequately addresses the relevant impacts of actions which can be taken under the plan and details the measures which will be taken to ensure that there are no unacceptable or unsustainable impacts on a matter protected by Part 3 of the Act;
- (d) any measures that the Minister may require as a condition of a declaration that are consistent with the bioregional plan;

Example: Environmental monitoring.

- (e) the development of the bioregional plan included consultation with:
 - (i) the Australian community generally; and
 - (ii) groups who have a special interest in, or are especially affected by, the bioregional plan or actions which can be taken under the bioregional plan;
- (f) the consultation included the release of a draft bioregional plan for public comment allowing at least 60 business days for the receipt of comments;
- (g) the bioregional plan was revised taking into account any comments received.

2A.04 Publication of a declaration or instrument

For subsection 37L(2) of the Act, a declaration made under section 37A of the Act or an instrument made under section 37K of the Act must be published:

- (a) in the *Gazette*; and
- (b) at an appropriate location on the Internet; and
- (c) if the information is relevant to Norfolk Island, the Territory of Cocos-Keeling or the Territory of Christmas Island—in the Government Gazette of the relevant territory.

Part 2B—Bilaterally accredited management plans

- Note: Under section 45 of the Act, the Minister may enter into a bilateral agreement with a State or self-governing Territory in relation to 1 or more of the following:
- protecting the environment;
 - promoting the conservation and ecologically sustainable use of natural resources;
 - ensuring an efficient, timely and effective process for environmental assessment and approval of actions;
 - minimising duplication in the environmental assessment and approval process through Commonwealth accreditation of the processes of the State or Territory (or vice versa).

Such an agreement may declare that actions in a specified class of actions approved in accordance with a management plan accredited in accordance with subsection 46(3) of the Act do not require approval under Part 9 of the Act for the purposes of a specified provision of Part 3 (see the Act, subsection 46(1)).

2B.01 Criteria for accreditation of management plans for World Heritage properties and National Heritage places

- (1) This regulation concerns the accreditation of a management plan for:
- (a) a declared, or proposed, World Heritage property; or
 - (b) a National Heritage place.

Note: A bilaterally accredited management plan may allow for the declaration of actions that do not then need approval under Part 9 of the Act for the purposes of a specified provision of Part 3—see subsection 46(1) of the Act. The relevant provisions of Part 3 in relation to a World Heritage property are sections 12 and 15A, and in relation to a National Heritage place, sections 15B and 15C.

Criteria for management plan

- (2) For paragraph 46(3)(a) of the Act, the criteria set out in subregulations (3) to (5) are prescribed in relation to the management plan.
- (3) Development of the management plan must have included consultation with:
- (a) the Australian community generally; and
 - (b) any particular groups having a special interest in the property or place, or likely to be especially affected by a management plan for the property or place.
- (4) The public consultation mentioned in subregulation (3) must have included the release of a draft management plan for public comment and the allowing of at least 20 business days for the receipt of comment by the State or Territory organisation that is responsible for developing the plan.

Note: Subsections 46(2), 51(2) and 51A(2) of the Act also set out requirements about accreditation of management plans.

Content of the management plan

- (5) A management plan for a declared or proposed World Heritage property or a National Heritage place:

Regulation 2B.01

- (a) must outline the process of public consultation that was undertaken in the development of the plan; and
- (b) must state the law under which the plan is in force; and
- (c) must include a description of the property or place, including its boundary and the relevant World Heritage or National Heritage values; and
- (d) must state what must be done to ensure that the relevant World Heritage or National Heritage values are identified, conserved, protected, presented and transmitted to future generations and, if appropriate, rehabilitated; and
- (e) must set out the means by which risk management of the property or place will be addressed, including:
 - (i) identifying the risks to the relevant World Heritage or National Heritage values; and
 - (ii) providing an analysis of the potential effect of each identified risk on the relevant World Heritage or National Heritage values, including an estimation of the nature, extent and likelihood of the risk; and
 - (iii) setting out risk management strategies to protect and conserve the relevant World Heritage or National Heritage values; and
- (f) must provide that adequate assessment of the impacts, on the relevant World Heritage or National Heritage values, of any proposed actions provided for under the plan, or that may arise during the life of the plan, has been, or will be, undertaken by means specified in the plan; and
- (g) must set out the means, any legislation other than the plan, and the processes, that:
 - (i) were used in assessing the impacts of actions that are provided for under the plan; and
 - (ii) are to be used in assessing the impacts of actions that may arise during the life of the plan; and
- (h) must require that the impacts of any actions likely to have a significant impact on the relevant World Heritage or National Heritage values have been, or will be, assessed by means that provide environmental assessment processes that meet the recommendations of regulations 3.03 and 3.04 and Schedule 1; and
- (i) must provide that actions in relation to the property or place may be approved only in accordance with the plan; and
- (j) must require a decision-maker to take account of the precautionary principle in making a decision in relation to the property or place; and
- (k) must set out the means, and any legislation other than the plan, that:
 - (i) enable the setting of enforceable conditions to ensure that the relevant World Heritage or National Heritage values are conserved, protected, presented and transmitted to future generations and, if appropriate, rehabilitated; and
 - (ii) provide for any subsequent monitoring, auditing and enforcement of approvals and any conditions attached to an approval; and
- (l) must set out means by which the plan will seek to prevent, or minimise the impacts of, any actions likely to degrade the relevant World Heritage or

Regulation 2B.01

National Heritage values, including actions leading to cumulative degradation; and

- (m) must state that actions that will have unacceptable or unsustainable impacts (in particular, actions that will have a significant impact on the relevant World Heritage or National Heritage values) are inconsistent with the plan and cannot be approved; and
- (n) must set out means for the plan to be enforced, including, in appropriate circumstances, the imposition of penalties upon a person taking an action that is inconsistent with the plan; and
- (o) must ensure that management actions for values that are not the relevant World Heritage or National Heritage values are consistent with the management of the relevant World Heritage or National Heritage values; and
- (p) must promote the integration of Commonwealth, State or Territory, and local government responsibilities for the property or place; and
- (q) must provide for continuing monitoring and reporting on the state of the relevant World Heritage or National Heritage values; and
- (r) must provide that the plan is to be reviewed at intervals of not more than 5 years.

Criterion for law of State or Territory

- (6) For paragraph 46(3)(a) of the Act, the criterion that the law of the State or Territory under which the management plan is in force (or is to be in force) must be capable of providing protection for the relevant World Heritage or National Heritage values of the property or place is prescribed in relation to that law of the State or Territory.

Part 3—Bilateral agreements to which s 47(1) of the Act apply

 - (iii) by environmental impact statement under Division 6 of Part 8 of the Act; or
 - (iv) by inquiry under Division 7 of Part 8 of the Act.

3.03 Public access to assessment documentation

- (1) The bilateral agreement must provide that documentation about each assessment made under the manner of assessment specified in the agreement must be made available to the public.
- (2) However, the bilateral agreement may provide that access to relevant documents may be restricted if it would not be available if the action to which the bilateral agreement applies had been assessed under Part 8 of the Act by the Commonwealth.

Note: Information is not available on the grounds of national security, if it is advice to the Minister or if it is commercial-in-confidence. See, for example, the Act, section 95.

3.04 Public comment—particular needs groups

The bilateral agreement must provide that special arrangements should be made, if appropriate, to ensure that affected groups with particular communication needs have adequate opportunity to comment on actions to be assessed under the manner of assessment specified in the agreement.

3.05 Application of Division 3.3

This Division applies to each manner of assessment specified in an agreement described in subsection 47(1) of the Act.

3.06 Manner of assessment

The bilateral agreement may make a declaration in accordance with subsection 47(1) of the Act only if the specified manner of assessment meets the criteria mentioned in Schedule 1.

 - (b) information that demonstrates that a change in the potential impacts of the action is likely to happen with a high degree of certainty.
- (4) For a matter protected under Part 3 of the Act, a request in relation to paragraph 78(1)(aa) of the Act must also contain information that:
 - (a) identifies the changed circumstances; and
 - (b) establishes why the circumstances were unforeseen at the time the original decision was made; and

- (4) A person who takes part in whale watching must comply with regulations 8.08, 8.09 and 8.09A.

Part 8A—Access to biological resources in Commonwealth areas

Division 8A.1—Preliminary

8A.01 Purpose of Part 8A

For section 301 of the Act, the purpose of this Part is to provide for the control of access to biological resources in Commonwealth areas to which this Part applies by:

- (a) promoting the conservation of biological resources in those Commonwealth areas, including the ecologically sustainable use of those biological resources; and
- (b) ensuring the equitable sharing of the benefits arising from the use of biological resources in those Commonwealth areas; and
- (c) recognising the special knowledge held by indigenous persons about biological resources; and
- (d) establishing an access regime designed to provide certainty, and minimise administrative cost, for people seeking access to biological resources; and
- (e) seeking to ensure that the social, economic and environmental benefits arising from the use of biological resources in those Commonwealth areas accrue to Australia; and
- (f) contributing to a nationally consistent approach to access to Australia's biological resources.

Note: For the meaning of *Commonwealth area*, see the Act, section 525.

8A.02 Application of Part 8A to Commonwealth areas

This Part applies to Commonwealth areas but does not apply to land leased by the Commonwealth or a Commonwealth agency unless the Commonwealth or the Commonwealth agency that holds the lease also holds a usage right in relation to the land that entitles the lessee to control access to the biological resources in and on the land.

Note 1: For the meaning of *Commonwealth area*, see the Act, section 525.

Note 2: Access to biological resources in Commonwealth reserves must be in accord with provisions of the Act and these Regulations dealing with Commonwealth reserves.

8A.03 Meaning of *access to biological resources*

(1) In this Part:

access to biological resources means the taking of biological resources of native species for research and development on any genetic resources, or biochemical compounds, comprising or contained in the biological resources (other than an activity mentioned in subregulation (3)).

Regulation 8A.04

Examples: Examples of *access to biological resources* include collecting living material or analysing and sampling stored material, for various purposes including taxonomic research, other research and potential commercial product development.

Note: For the meaning of *biological resources*, *genetic resources* and *native species*, see the Act, section 528.

- (2) A person is taken to have access to biological resources if there is a reasonable prospect that biological resources taken by the person will be subject to research and development on any genetic resources, or biochemical compounds, comprising or contained in the biological resources.
- (3) The definition, *access to biological resources*, in subregulation (1) does not include the following activities:
- (a) the taking of biological resources by indigenous persons:
 - (i) for a purpose other than a purpose mentioned in subregulation (1); or
 - (ii) in the exercise of their native title rights and interests;
 - (b) access to human remains;
 - (c) the taking of biological resources that have been cultivated or tended for a purpose other than a purpose mentioned in subregulation (1);
 - (d) the taking of public resources for a purpose other than a purpose mentioned in subregulation (1);
 - (e) the taking of a biological resource that is:
 - (i) a genetically modified organism for the purposes of section 10 of the *Gene Technology Act 2000*; or
 - (ii) a plant variety for which a Plant Breeder's Right has been granted under section 44 of the *Plant Breeder's Rights Act 1994*;
 - (f) access to biological resources specified in a declaration under regulation 8A.05.
- (4) For paragraph (3)(d), *taking of public resources* includes the following activities:
- (a) fishing for commerce or recreation, game or charter fishing or collecting broodstock for aquaculture;
 - (b) harvesting wildflowers;
 - (c) taking wild animals or plants for food;
 - (d) collecting peat or firewood;
 - (e) taking essential oils from wild plants;
 - (f) collecting plant reproductive material for propagation;
 - (g) commercial forestry.

8A.04 Meaning of *access provider*

- (1) In this Part:

access provider, for biological resources in a Commonwealth area to which this Part applies, means the following:

- (a) if the area is land owned by the Commonwealth—the Commonwealth;

Regulation 8A.05

- (b) if the area is land owned by a Commonwealth agency—the Commonwealth agency;
- (c) if the area is land held under lease by the Commonwealth or a Commonwealth agency and is indigenous people's land—the owner of the land;
- (d) if the area is land held under lease by the Commonwealth and is not indigenous people's land—the Commonwealth;
- (e) if the area is land held under lease by a Commonwealth agency and is not indigenous people's land—the Commonwealth agency;
- (f) if the area is land in an external Territory (except the Territory of Norfolk Island) or in the Jervis Bay Territory, and is not land to which paragraph (a), (b), (c), (d) or (e) applies—the Commonwealth;
- (g) if the area is a Commonwealth marine area—the Commonwealth;
- (h) if the area is any other area of land, sea or seabed that is included in a Commonwealth reserve—the Commonwealth;
- (i) if native title exists in relation to the area—the native title holders for the area.

Note: There may be more than one access provider for biological resources. For example, if native title exists in relation to a Commonwealth area, the Commonwealth (or Commonwealth agency) and the native title holders are both access providers.

- (2) A reference to land in subregulation (1) includes a reference to airspace over the land.

Note: A Commonwealth marine area includes areas of airspace and seabed relating to the area—see the definition of *Commonwealth marine area* in section 24 of the Act.

8A.05 Exemption for specified biological resources or collections

- (1) The Minister may declare that this Part does not apply to specified biological resources or a specified collection of biological resources (including future additions to the collection) if:
- (a) the resources are held as specimens away from their natural environment (whether in a collection or otherwise) by a Commonwealth Department or Commonwealth agency and there are reasonable grounds to believe that access to the biological resources is administered by the Department or agency in a manner that is consistent with the purpose of this Part; or
 - (b) there are reasonable grounds to believe that:
 - (i) access to the resources is controlled by another Commonwealth, self-governing Territory or State law; and
 - (ii) if the declaration is made—access to the resources would be in a manner that is consistent with the purpose of this Part; or
 - (c) use of the resources is required to be controlled under any international agreement to which Australia is a party.

Example: The International Treaty on Plant Genetic Resources for Food and Agriculture, to which Australia is a signatory, obliges signatories to control access to the genetic resources of some foods in some circumstances.

Regulation 8A.06

- (2) A holder of biological resources to which paragraph (1)(a) applies may request the Minister, in writing, to make a declaration under subregulation (1).
- (3) A declaration under paragraph (1)(b) or (c) may provide that this Part does not apply to the biological resources in specified circumstances.
- (4) A declaration under subregulation (1) must be published in the *Gazette*.

8A.06 Access to biological resources requires permit

- (1) A person may have access to biological resources in a Commonwealth area to which this Part applies only in accordance with a permit in force under Part 17.

Penalty: 50 penalty units.

Note: The Minister may issue a permit only if the applicant has given the Minister a copy of each benefit-sharing agreement required in relation to the application—see paragraph 17.03A(6)(a).

- (2) Subregulation (1) does not apply to a person in relation to biological resources that are in a Commonwealth area for which the person is an access provider.

Division 8A.2—Access to biological resources for commercial purposes or potential commercial purposes

8A.07 Benefit-sharing agreement required

- (1) An applicant for a permit for access to biological resources for commercial purposes or potential commercial purposes in a Commonwealth area to which this Part applies must enter into a benefit-sharing agreement with each access provider for the resources.

Note 1: There may be more than one access provider for biological resources—see subregulation 8A.04(1).

Note 2: Since benefit-sharing agreements under this Division may purport to affect native title rights and interests in relation to land or water, applicants need to be aware of the provisions of the *Native Title Act 1993* and the availability of indigenous land use agreements under Division 3 of Part 2 of that Act as a means to validate actions that may otherwise be construed to be invalid future acts by that Act.
- (2) If an access provider is the Commonwealth, the Secretary of the Commonwealth Department with administrative responsibility for the Commonwealth area may, on behalf of the Commonwealth, enter into the benefit-sharing agreement.
- (3) An agreement may be both a benefit-sharing agreement, if it complies with this Division, and an indigenous land use agreement within the meaning of the *Native Title Act 1993*.
- (4) The Minister may publish in the *Gazette* a model benefit-sharing agreement as a guide for applicants.

8A.08 Benefit-sharing agreements

A benefit-sharing agreement must provide for reasonable benefit-sharing arrangements, including protection for, recognition of and valuing of any indigenous people's knowledge to be used, and must include the following:

- (a) full details of the parties to the agreement;
- (b) details regarding the time and frequency of entry to the area that has been agreed to be granted;
- (c) the resources (including the name of the species, or lowest level of taxon, to which the resources belong, if known) to which access has been agreed to be granted and the quantity of the resources that has been agreed can be collected;
- (d) the quantity of the resources that has been agreed can be removed from the area;
- (e) the purpose of the access, as disclosed to the access provider;
- (f) a statement setting out the proposed means of labelling samples;
- (g) the agreed disposition of ownership in the samples, including details of any proposed transmission of samples to third parties;

Part 8A Access to biological resources in Commonwealth areas

Division 8A.2 Access to biological resources for commercial purposes or potential commercial purposes

Regulation 8A.09

- (h) a statement regarding any use of indigenous people's knowledge, including details of the source of the knowledge, such as, for example, whether the knowledge was obtained from scientific or other public documents, from the access provider or from another group of indigenous persons;
- (i) a statement regarding benefits to be provided or any agreed commitments given in return for the use of the indigenous people's knowledge;
- (j) if any indigenous people's knowledge of the access provider, or other group of indigenous persons, is to be used, a copy of the agreement regarding use of the knowledge (if there is a written document), or the terms of any oral agreement, regarding the use of the knowledge;
- (k) the details of any proposals of the applicant to benefit biodiversity conservation in the area if access is granted;
- (l) details of the benefits that the access provider will receive for having granted access.

8A.09 Consultation with owners of leased land

If the land, or part of the land, that is the subject of an application for access to biological resources is land held under lease by the Commonwealth or a Commonwealth agency (including land leased in the Territory of Norfolk Island by the Commonwealth or a Commonwealth agency), each access provider must consult with the owner of that land before entering into a benefit-sharing agreement.

8A.10 Informed consent

- (1) If the biological resources to which access is sought are in an area that is indigenous people's land and an access provider for the resources is the owner of the land or a native title holder for the land, the owner or native title holder must give informed consent to a benefit-sharing agreement concerning access to the biological resources.
- (2) In considering whether an access provider has given informed consent to a benefit-sharing agreement, the Minister must consider the following matters:
 - (a) whether the access provider had adequate knowledge of these Regulations and was able to engage in reasonable negotiations with the applicant for the permit about the benefit-sharing agreement;
 - (b) whether the access provider was given adequate time:
 - (i) to consider the application for the permit, including time to consult with relevant people; and
 - (ii) if the biological resources are in an area that is indigenous people's land and an access provider for the resources is the owner of the land, to consult with the traditional owners of the land; and
 - (iii) to negotiate the benefit-sharing agreement;
 - (c) if the biological resources are in an area that is indigenous people's land and an access provider for the resources is an owner of the land and is

Regulation 8A.11

- represented by a land council—whether the views of the land council about the matters mentioned in paragraphs (a) and (b) have been sought;
- (d) if access is sought to the biological resources of an area in relation to which native title exists—the views of any representative Aboriginal/Torres Strait Islander body or any body performing the functions of a representative body, within the meaning of the *Native Title Act 1993*, for the area about the matters mentioned in paragraphs (a) and (b);
- (e) whether the access provider has received independent legal advice about the application and the requirements of these Regulations.
- (3) The Minister may be satisfied that informed consent has been given by any native title holders who may be affected by the issue of a permit if the benefit-sharing agreement:
- (a) is a registered indigenous land use agreement, under the *Native Title Act 1993*, for the area; and
- (b) authorises the action proposed to be taken under the permit; and
- (c) sets out the native title holders' consent to the issue of the permit.

Note: The requirements relating to indigenous land use agreements are set out in Part 2, Division 3 of the *Native Title Act 1993*.

8A.11 Requirement for permit

A benefit-sharing agreement takes effect only if a permit for the proposed access is issued under Part 17.

Division 8A.3—Access to biological resources for non-commercial purposes

8A.12 Written permission of access provider required

- (1) An applicant for a permit for access to biological resources for non-commercial purposes in a Commonwealth area to which this Part applies must obtain the written permission of each access provider for the resources to:
 - (a) enter the Commonwealth area; and
 - (b) take samples from the biological resources of the area; and
 - (c) remove samples from the area.

Note 1: There may be more than one access provider for biological resources—see subregulation 8A.04(1).

Note 2: Since a written permission of the kind mentioned in this regulation may purport to affect native title rights and interests in relation to land or water, applicants need to be aware of the provisions of the *Native Title Act 1993* and the availability of indigenous land use agreements under Division 3 of Part 2 of that Act as a means to validate actions that may otherwise be construed to be invalid future acts by that Act.

- (2) If an access provider is the Commonwealth, the Secretary of the Commonwealth Department with administrative responsibility for the Commonwealth area may, on behalf of the Commonwealth, give the written permission required under subregulation (1).
- (3) A written permission may be both a permission under subregulation (1), if it complies with this Division, and an indigenous land use agreement within the meaning of the *Native Title Act 1993*.

8A.13 Statutory declaration

An applicant for a permit for access to biological resources for non-commercial purposes in a Commonwealth area to which this Part applies must provide a copy of a statutory declaration given to each access provider declaring that the applicant:

- (a) does not intend to use the biological resources, to which the application relates, for commercial purposes; and
- (b) undertakes to give a written report on the results of any research on the biological resources to each access provider; and
- (c) undertakes to offer, on behalf of each access provider, a taxonomic duplicate of each sample taken to an Australian public institution that is a repository of taxonomic specimens of the same order or genus as those collected for permanent loan; and
- (d) undertakes not to give a sample to any person, other than an institution referred to in paragraph (c), without permission of each access provider; and
- (e) undertakes not to carry out, or allow others to carry out, research or development for commercial purposes on any genetic resources or

biochemical compounds comprising or contained in the biological resources unless a benefit-sharing agreement has been entered into, in accordance with Division 8A.2, with each access provider.

8A.14 Requirement for permit

A written permission given under subregulation 8A.12(1) takes effect only if a permit for the proposed access is issued under Part 17.

Division 8A.4—Assessment of applications

8A.15 Assessment by Minister

- (1) In assessing an application for a permit, the Minister may consult any Commonwealth Department, any Commonwealth agency or any other person that may have information relevant to the application.
- (2) If the application is for access to biological resources for commercial purposes, the Minister:
 - (a) must take into account the extent to which the requirements of regulation 8A.08 have been met by the benefit-sharing agreement; and
 - (b) must consider whether all the other requirements of Division 8A.2 have been met.
- (3) If the application is for access to biological resources for non-commercial purposes, the Minister must consider whether the requirements of Division 8A.3 have been met.

8A.16 Assessment of environmental impact

- (1) This regulation applies to an application for a permit to which paragraph 17.01(ab) applies if the proposed access is not a controlled action.

Note: For the meaning of *controlled action*, see the Act, section 67.
- (2) The application must be assessed by public notice if the Minister believes, on reasonable grounds, that the proposed access to biological resources is likely to have more than negligible environmental impact.
- (3) After all the documents required to consider an application have been received by the Minister and the application is required to be assessed by public notice:
 - (a) the Minister must tell the applicant, within 20 business days after receiving all the required documents, that the application is required to be assessed by public notice; and
 - (b) the applicant must give the Minister a summary of the likely environmental impacts of the proposed access; and
 - (c) within 10 business days after receiving the summary, the Minister must:
 - (i) publish on the Internet a notice inviting any person to comment on the likely environmental impacts of the proposed access within a specified time (which must be at least 10 business days); and
 - (ii) invite each person registered under regulation 8A.17 to give comments to the Minister within a specified time (which must be at least 10 business days); and
 - (iii) publish on the Internet any documents relevant to public consideration of the proposed access and its environmental impact; and

Regulation 8A.17

- (d) within 5 business days after the end of the period allowed by the invitation for comments, the Minister must give the applicant a copy of any comments received by the Minister.
- (4) The applicant must give the Minister a copy of any response the applicant wishes to make to any comments received.

8A.17 Register for consultation when assessment by public notice is required

- (1) At intervals of not more than 12 months, the Minister must publish a notice inviting applications from persons who want to be registered, for a specified period of at least 12 months, to be told of applications to which subregulation 8A.16(2) applies.
- (2) The notice must be published:
 - (a) in the *Gazette*; and
 - (b) on the Department's website, www.deh.gov.au; and
 - (c) in a daily newspaper that circulates throughout Australia.
- (3) The Minister must register any person who applies in writing for registration.
- (4) Registration has effect for the period specified in the notice.

Division 8A.5—Register of permits

8A.18 Register of permits

- (1) The Minister must keep a register of information about permits issued for this Part.

Note: The Register may be viewed on the Department's website, www.deh.gov.au.

- (2) Information is not to be included in the register if the Minister believes that the information:
- (a) is culturally sensitive; or
 - (b) if disclosed, could:
 - (i) damage a person's commercial interests; or
 - (ii) result in a risk to the environment; or
 - (iii) harm the national interest.

Division 8A.6—Records and samples**8A.19 Permit holder to keep records**

- (1) A person issued a permit for access to biological resources under Part 17 must keep the following records for each sample taken:
 - (a) for each record about a sample, a unique identifier for the sample that is also on a label attached to the sample or its container;
 - (b) the date the sample was taken;
 - (c) the place from which the sample was taken;

- (3) A record mentioned in subregulation (1) for a sample must be retained by the permit holder while the sample is in the holder's possession.

8A.20 Disposal of samples

- (1) If a permit holder does not propose to keep a sample for which he or she has a record of the type mentioned in subregulation 8A.19(1), the permit holder must offer the sample and record to each access provider.
- (2) If no access provider agrees to take the sample and record in the circumstances mentioned in subregulation (1), the permit holder may dispose of the sample and, at that time, must send the record and details of the disposal of the sample to the Department.

14.03 Infringement notices

- (1) If there are reasonable grounds for believing that a person has committed an offence against section 142B of the Act or a regulation mentioned in Schedule 10, a ranger or an authorised officer may serve an infringement notice, or cause an infringement notice to be served, on the person in accordance with regulation 14.04.
- (2) The notice must set out the following information:
 - (a) the name and address of the person served (unless the notice is served in accordance with subparagraph 14.04(1)(c)(ii));
 - (b) the provision of the Act or these Regulations that it is alleged has been contravened;
 - (c) details of the alleged offence, including:
 - (i) the day, and (if appropriate) the time, on which it is alleged to have been committed; and
 - (ii) the place at which it is alleged to have been committed;
 - (d) the maximum penalty that may be imposed by a court for the offence;
 - (e) the amount payable as the infringement notice penalty;
 - (f) a statement that, if the person prefers that the matter not be dealt with by a court, he or she may signify that preference by paying the infringement notice penalty:
 - (i) before the end of 28 days after the day the notice is served; or
 - (ii) if a further period is allowed by the Director or Secretary under regulation 14.05—before the end of that further period; or
 - (iii) if payment by instalments is permitted under regulation 14.06—in accordance with the permission;
 - (g) how, and where, the infringement notice penalty may be paid;
 - (h) a statement that if, before the end of 28 days after service of the notice, the person notifies the Director or Secretary, in the manner set out in the infringement notice, of any facts or matters that the person believes ought to be taken into account in relation to the alleged offence:
 - (i) time for payment of the penalty will be extended to the extent necessary to enable a decision to be made about those facts or matters; and

Schedule 8—Australian IUCN reserve management principles

(regulation 10.04)

Part 1—General administrative principles

1 Community participation

Management arrangements should, to the extent practicable, provide for broad and meaningful participation by the community, public organisations and private interests in designing and carrying out the functions of the reserve or zone.

2 Effective and adaptive management

Management arrangements should be effective and appropriate to the biodiversity objectives and the socio-economic context of the reserve or zone. They should be adaptive in character to ensure a capacity to respond to uncertainty and change.

3 Precautionary principle

A lack of full scientific certainty should not be used as a reason for postponing measures to prevent degradation of the natural and cultural heritage of a reserve or zone where there is a threat of serious or irreversible damage.

4 Minimum impact

The integrity of a reserve or zone is best conserved by protecting it from disturbance and threatening processes. Potential adverse impacts on the natural, cultural and social environment and surrounding communities should be minimised as far as practicable.

5 Ecologically sustainable use

If resource use is consistent with the management principles that apply to a reserve or zone, it should (if it is carried out) be based on the principle (the principle of *ecologically sustainable use*) that:

- (a) natural resources should only be used within their capacity to sustain natural processes while maintaining the life-support systems of nature; and
- (b) the benefit of the use to the present generation should not diminish the potential of the reserve or zone to meet the needs and aspirations of future generations.

6 Transparency of decision-making

The framework and processes for decision-making for management of the reserve or zone should be transparent. The reasons for making decisions should be publicly available, except to the extent that information, including information that is culturally sensitive or commercial-in-confidence, needs to be treated as confidential.

7 Joint management

If the reserve or zone is wholly or partly owned, by Aboriginal people, continuing traditional use of the reserve or zone by resident indigenous people, including the protection and maintenance of cultural heritage, should be recognised.

Part 2—Principles for each IUCN category

- 3.06 Respect should be maintained for the ecological, geomorphologic, sacred and aesthetic attributes for which the reserve or zone was assigned to this category.
- 3.07 The needs of indigenous people should be taken into account, including subsistence resource use, to the extent that they do not conflict with these principles.
- 3.08 The aspirations of traditional owners of land within the reserve or zone, their continuing land management practices, the protection and maintenance of cultural heritage and the benefit the traditional owners derive from enterprises, established in the reserve or zone, consistent with these principles should be recognised and taken into account.

- 5.03 Scientific research and environmental monitoring that contribute to reserve management should be facilitated as primary activities associated with sustainable resource management.
- 5.04 The reserve or zone may be developed for public education and appreciation of the characteristics of habitats, species or collections and of the work of wildlife management.
- 5.05 Management should seek to ensure that exploitation or occupation inconsistent with these principles does not occur.
- 5.06 People with rights or interests in the reserve or zone should be entitled to benefits derived from activities in the reserve or zone that are consistent with these principles.
- 5.07 If the reserve or zone is declared for the purpose of a botanic garden, it should also be managed for the increase of knowledge, appreciation and enjoyment of Australia's plant heritage by establishing, as an integrated resource, a collection of living and herbarium specimens of Australian and related plants for study, interpretation, conservation and display.

6 Protected landscape/seascape (category V)

- 6.01A This clause sets out the management principles for a protected landscape/seascape (IUCN protected area management category V).

Legislation history and amendment history—Endnotes 3 and 4

Amending laws are annotated in the legislation history and amendment history.

The legislation history in endnote 3 provides information about each law that has amended (or will amend) the compiled law. The information includes commencement details for amending laws and details of any application, saving or transitional provisions that are not included in this compilation.

The amendment history in endnote 4 provides information about amendments at the provision (generally section or equivalent) level. It also includes information about any provision of the compiled law that has been repealed in accordance with a provision of the law.

Editorial changes

The *Legislation Act 2003* authorises First Parliamentary Counsel to make editorial and presentational changes to a compiled law in preparing a compilation of the law for registration. The changes must not change the effect of the law. Editorial changes take effect from the compilation registration date.

If the compilation includes editorial changes, the endnotes include a brief outline of the changes in general terms. Full details of any changes can be obtained from the Office of Parliamentary Counsel.

Misdescribed amendments

A misdescribed amendment is an amendment that does not accurately describe how an amendment is to be made. If, despite the misdescription, the amendment can be given effect as intended, then the misdescribed amendment can be incorporated through an editorial change made under section 15V of the *Legislation Act 2003*.

If a misdescribed amendment cannot be given effect as intended, the amendment is not incorporated and “(md not incorp)” is added to the amendment history.
